FNF RECEIVES NAPA QUALITY IN CONSTRUCTION AWARD

FNF Construction Inc. of a 2014 Quality in Construction Award for excellence in construction of an asphalt pavement on the [Navajo Route 20/89T Detour Construction Manager at Risk](#) ADOT project. The company received its award on Wednesday, Jan. 28, at a ceremony during the association's 60th Annual Meeting in Marco Island, Fla.

"Quality pavements are something every road builder strives to construct. We want to build pavements that deliver on the promise of high performance and drivability for the public," said William C. Ensor III, NAPA 2014 Chairman. "Projects that earn a Quality in Construction Award have been measured against industry best practices designed to live up to that promise. I'm proud to say that, in earning a 2014 QIC Award, FNF Construction Inc. has met or exceeded these rigorous quality standards."

The awarded project, Navajo Route 20/US 89T in the Navajo Nation, was an emergency project that required FNF to build a temporary paved detour on a dirt road to bypass an essential road closed by a landslide. FNF worked closely with subcontractors and the Arizona Department of Transportation to reduce times for material placement and to streamline construction procedures. The road was completed in just four months. *Pictured below: FNF paving, sampling, and celebrating success.*

The National Asphalt Pavement Association (NAPA) is the only trade association that exclusively represents the interests of the asphalt producer/contractor on the national level with Congress, government agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. The association provides technical, educational, and marketing materials and information to its members; supplies product information to users and specifiers of paving materials; and conducts training courses. The association, which counts more than 1,100 companies as members, was founded in 1955.
